DETAILED ACTION

Allowable Subject Matter

Claims 1-33 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As to claims 1 and 18, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a method and system for calibrating a gap measuring tool, the method and system comprising a calibration standard being provided that includes at least one mock slider in contact with a mock disc, the slider including a recessed portion, the recessed portion being a slider surface recessed with respect to a disc surface, and then comparing a distance between the disc and the surface of the recessed portion of the slider that is observed by an optical measurement with a determined actual distance, in combination with the rest of the limitations of the above claims.

As to claim 32, the prior art of record, taken either alone or in combination, fails to disclose or render obvious a method for calibrating a gap measuring tool, the method comprising a calibration standard being provided that includes at least one mock slider in contact with a mock disc, the slider having an inclined surface, the inclined surface maintaining a gap varying with position between the disc and slider, determining an actual and observed by optical measurement gap size between the disc and the inclined surface, developing a plurality of curves representative of light intensity with respect to location on the incline, each curve representing an individual frequency, and associating a combination of light intensity values to their respective gap size for each of a plurality of locations, in combination with the rest of the limitations of the above claim.

For further reasoning, please see the applicants' arguments dated December 15, 2005 in response to the previous Office Action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael A. Lyons whose telephone number is 571-272-2420. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gregory J. Toatley can be reached on 571-272-2800 ext. 77. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
